

2010 Conference Call for papers

PIEA – Photo Imaging Education Association
IPT – Institute of Photographic Technology, Inc.
AIMBI – Australian Institute of Medical & Biological Illustration

Australia's professional organisations representing photo education, science, medicine and art are convening in Melbourne, Victoria, June 3-6, 2010 for a conference exploring and celebrating a wide range of topics in photographic imaging, education and communications.

We encourage educators and practitioners from a diversity of backgrounds in photographic imaging and communications to participate as speakers in Melbourne 2010. The aim of the conference is to share the diversity of imaging professions and interests. This is also an opportunity to attend the extensive photographic trade show all under one roof and ask the manufacturers and distributors questions about the latest technologies

Presentations are by invitation. We encourage you to submit a title and abstract of between 150-250 words for consideration by the Program Committee. Send as a Word or text document via email to g.spring@rmit.edu.au

You will be notified by email of your inclusion in the academic program by December 20 2009.

You can view the 2009 program and abstracts by visiting
<http://www.pmaaustralia.com.au/a/95.html>

Please note, the deadline for paper submission is 16 December 2009.

Presentation and Abstract guidelines

Audience

Attendees are educators, users and producers of visual communications in health care and scientific arenas. They may be specialists in photography, computer graphics and video. Attendees may be new to the field, or experienced professionals.

Education

Attendees seek to enhance their professional knowledge and competency through the sharing of both emerging and current technologies. The scientific program is expected to meet this need.

Role of Speaker

Your presentation should provide the attendee with a learning experience in specialized knowledge and/or skills. Content should be general in nature. The material you present should be timely, relevant and meet the objectives of the conference. Your knowledge of, and enthusiasm for, your subject should be apparent.

Abstract

Describe the problem, issue, or technique you propose to present. Include the major points the audience will take away from your presentation and why it should be important to conference attendees.

Presentation duration

Presentations will be between 10 – 20 minutes. Please advise your time requirement.

(Presentations will be supported by a Mac laptop with Powerpoint and Keynote.)

**Interested participants should contact the Academic Program Chair:
Associate Professor Gale E. Spring,
President, PIEA Australia
Phone: +61 3 9925 7743
